INTERACTION CROSS SECTIONS OF PARTICLES
AT HIGH ENERGIES, tr. by Richard B. Mudge.
[1960] 56p, 92 refs.

Order from LC or SLA m\$3.60, ph\$9.30
UCRL Trans-566

Trans. of Joint Institute for Nuclear [Research]
(USSR). [Rept.] P-509, Dubna, 1960.

Previous Soviet and non-Soviet data on the interaction cross sections of particles of various kinds (nucleons, π -mesons, and K-mesons) at energies greater than 0.8 Bev are examined and interpreted. The interpretation concerns the constancy of interaction cross sections at high energies, the equality of the interaction cross sections of particles and antiparticles, and the dependence of the cross sections on isotopic spins and on the spins of colliding particles.
